If you're thinking about professional in-house finishing, think about our new JetMounter line of cold-mount laminators.

They're easy-to-use for one-off or volume production and can accommodate cardstock, foam board, MDF or rigid

PVC board. Because they deliver both speed and flexibility for mounting and laminating applications, these manual and variable-speed laminators are ideal for picture framers and photographers.

Features normally found on more expensive machines, like tension clutches for superior control, are standard on the JM43 and JM53.
